HOW WE STARTED

In 2013, we imagined a world where every girl knew her value, her purpose, and the unique gift that she is to the world, and our pilot program was born. Serving a group of 20 seventh and eighth-grade girls in Broward County, Florida, we ran a 20-week elective course, designed to help girls improve their feelings of self-value, identify their gifts, and talents, and set academic and personal development goals.
